POETRY.

DEATH OF THE OLD YEAR.

'Tis noon of night, and the hungry wind Howls like a wolf through the empty streets-Starving-and seeking whate'er it can find, Biting and killing whoever it meets,

Cold, cold the night! The congealed stars Like icicles hang from the roof o'er head ; The street light, crossing in fiery bars, Like thin imaged orbs their chill lustre shed.

Daylight and darkness blended in one ! They from each other some element prog; Nor night nor daylight; nor noon nor sun; But mingled are each in a golden fog.

Awful the hour in its ghastly hush-Hushed save the voice of its cold winter blasts ; And whispers deep through the purple flush Reveal the conclave of the sacred vasts.

An old man, bent 'neath his load of years, His long locks whiter than the drifted snow, His wan cheek stiffened with the frozen tears. His thin hands clutched and his head bowed low

Alone with the night cringes close to the ground Alone with the night where huge shadows tread; Alone with the night and its majestic sound-Alone with his God--for the old man is dead !

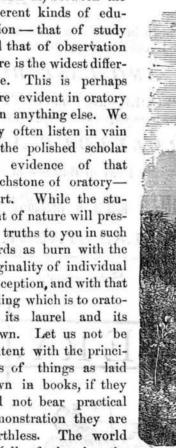

H. D. ESTABROOK.

St. Louis, Jan. 7th '75.

EDUCATION-APART FROM STUDY.

Our daily life is the great avenue through which pour the vehicles of information for the mind. It is there that the careful observer sees human nature as it is, not covered with the courteous mask of the drawing room, nor with the sacreligiouswhen assumed-livery of religion, but keenly following some object, the means of obtaining which unconsciously betray the character of the individual. Thoughts are suggested by associations. It is well then that such associations be of a pure character. It is very easy to do that which is evil, and equally hard to do that which is good. The life of a good man is a perpetual struggle, a hard but an ennobling one difficult at first, but always growing easier as the mind gains strength from the toil of battle, and gradually molding itself into the perfect end. It is a weak and dependent mind which gains no original inspiration from what transpires around it, and it is a barren and unproductive brain whose only ideas are the creations of another. The human mind is so constituted as to be susceptible to the influence of either good or evil. The workings of right are based on solidity. It operates from a given starting point to a pre-determined end. It is strong in the consciousness of virtuous and authentic authority. It derives its inspiration from faith which is a divine element, and converts, without the aid of reason, though to a ripe and well balanced intelligence these elements never conflict. When we cultivate the mind we cultivate the manners. Dickens said "No man can be a gentleman in manners until he is a gentleman at heart." The difference then in fashionable life between the gentleman and the dandy is, the one acts from an innate sense of courtesy and consideration, the other wears only an assumed polish which can be removed at the option of the wearer, and as circumstances dictate. The one is a gentleman always and everywhere, the other, only a figure of such, as occasion requires. Communion with experience is a happy medium in the diffusion of knowledge. Wisdom is the perfection of experience. The most trivial object is of some value, the daily occurrences in our life will teach us important lessons if properly considered, serving either as guides or warnings for the future. Dryden has said "Genius must be born and cannot be taught," Samuel Johnson however, to the contrary, "Genius is but persistent effort well directed." The latter is a more agreeable and fully as rational a supposition as the former. Johnson's life is an exemplification of its correctness. Even as small bodies physically envy a great and commanding presence, so mentally small minds envy great intellects, and this envy, though one of the baser passions, is thus through emulation often converted into a steppingwisdom are continually bursting into bloom vicious. The name of Poe is associated in the works of our best writers, present a and he is now a pronounced heathen.

around us, between the different kinds of education - that of study and that of observation there is the widest difference. This is perhaps more evident in oratory than anything else. We may often listen in vain to the polished scholar for evidence of that touchstone of oratoryheart. While the student of nature will present truths to you in such words as burn with the originality of individual conception, and with that feeling which is to oratory its laurel and its crown. Let us not be content with the principles of things as laid down in books, if they will not bear practical demonstration they are worthless. The world is full of theories, the

earth shakes with their explosions .--There are hosts of characters worthy of reflection and imitation. The "sands of time" are yellow with the gold of genius. The words of those men who wrote with a purpose, stand out in the ocean of surreptious literature of to-day like light-houses to warn the aspirant for fame, that it requires a will and a purpose as well as a genius to successfully weather the storms of disappointment. They did not pen their inspirations for the mere need of a fleeting fame, and to the most of them the commendation of man was nothing. Upon the literature of to-day there is the stamp of an undeniable depravity, there is an utter want worthy of genius. We note with disfavor the tendency toward sensationalism, and would gladly welcome a return to the ennobling example of our forefathers. The fact that we still have their sentiments on record makes the present style of literature the more distasteful, but among the think-

VIEW OF THE OMAHA HIGH SCHOOL BUILDING

most American minds with those elements | hidden mysteries of man's supernatural of evil which are found only in the lives of being, beautiful imagery, a lofty apprethe most depraved. It has been a misfortune to the memory of this man, that his life original ideal, are the elements conhas been the subject of harsh, unchristian criticism, rather than his works. His life The purview of this brief article prevents has been represented as devoid of those pleasures which the happy and virtuous only can enjoy; as one brooding melancholy, and that he lacked those essential qualities of mind and feeling that go to Possessing to a rare degree those analytical make up the perfect man. Anecdotes purely imaginative, and destructive of his critic, he lacked the essentiality of justice. honor, have been made matters of history against him. His life has been singularly and fearfully treated by unskillful biogof purpose and a servile catering to the raphers and vindictive calumniators. For they do, a ripe culture in all schools of taste of a mixed public which is itself un- a number of years indeed, since the Poet's composition, but all through these essays death, the standard edition of his life has been Griswold's, and from this work innumerable opinions have been formed to the discredit of the poet. So untrue, unrelia- lower and less intellectual level of personal ble, and vindictive is this work, that before detraction. In conjunction with his mercithe death of Dr. Griswold, it called forth less critiques, we find a stolid indifference the condemnation of our greatest poet. on his part as to the popular sentiment, ing class, Shakespeare, Johnson, Dickens Mr. G. R. Graham, publisher of the Maga- either for or against him. So marked was zine of which Poe was long time editor, speaks of Griswold's "Life" as the "fancy sketch of a jaundiced vision," and an "immortal infamy." This, with ficticious anecdotes, repeated anachronisms, and many other inconsistencies, forms the standard biography of him, whose works have shed an eternal lustre upon our literature, and whose name will ever stand high as a poet, as long as it is in the nature of man to appreciate true genius. So common has been J. M. R. the custom of critic moralists to penetrate the personal character of Poe, that to most are known before such works as "The Bells," " Annabel Lee," or "The Raven " been held up to the scrutiny of a never lenient public, and the weaknesses of the human will are made to vitiate his works. emanations of his pen, or the miseries of some parts of his life, shall not mitigate like we shall see them? Poe was not the cold, insensate, and ungentlemanly person of current biographers. N. P. Willis, with whom Poe was associated in conducting "The Mirror" in 1844, speaks of him, giving the opinion of six years friendship, "we had seen but one presentment of the man, aquiet, patient, industrious and most gentlemanly person.' Again, "invariably the same sad-mannered, winning and refined gentleman, the same as we had always known him." We live in the hope that time will correct these things in the poet's life, and that many events now laid against his reputation, will be obscured in the contemplation of his peculiar merit, and in the correct apexistence, died in 1849. Reaching through preciation of his talents. The writings of this period of time, his life presents one of Poe are perhaps the most original that have the saddest biographies ever written, and graced our literature, and now after the not as has been accepted, one of the most lapse of many years, in comparison with

force and vigor that enhances, with the increase of years. In their peculiarities and beauties they constitute a distinct class of composition ; the style so weird, so mysterious, and withal so sad, has never been weakened by successful plagiarism. Plagiarists have read Poe, and in vain, for his works, inviting imitation, baffle it. The mysterious element in his writings, the marked feature of Poe's style, is but the and melancholy mind. A life so fitful, a nature so delicate and sensitive, must of necessity leave

ciation of beauty, and a marked and spicuously displayed in all his works review of any of Poe's works. As poet and author he was eminently successful, but as a critic, a position he was naturally endowed to fill, he was not successful powers of mind so necessary to the true As specimens of acute and logical dissection of rhetoric, his critical essays are well worthy of careful perusal, indicating as there appears a caviling and fault-finding disposition which removes them from the plane of criticism and places them on the

THOUGHT.

Thought is the illuminator of the soul, the essence of spirituality, the monitor of reason; it is at once the motive force and controlling power of the intellect ; it directs the flight of imagination and sits in judgment on the appetites and passions; its action is universal, its power unlimited, it is the solver of all problems, the key to all mysteries, the elucidation of all principles ; it gives shape and substance to the aerial images of fancy, and enables man to deduct conclusions from the evidences of his senses : it is the creator of ideas, the mainspring of all mental actions, it guides. directs and controls the varied faculties of the human mind and lays bare to the eye outgrowth of a weary of the understanding the mysteries of nature.

> Without thought the reason of man would be the instinct of the brute, he would know no God for he could have no conception of cause and effect; he would have no original experience for he could know nothing spiritual, the deeper truths of nature would be hidden from him for there would be no power to explain its action. Truly is thought the most important of mental functions, the instrument that shall guide man upward step by step from the darkness of ignorance into the pure light of perfect wisdom.

J. D. S.

How DID SHE DO IT ? A Lincoln chambermaid is said to have got twelve State Senators into eleven bedrooms, and yet to have given each a separate room. Here we have the eleven bedrooms:

1 2 3 4 5 6 7 8 9 10 11

"Now," said she, "if two of you gentlemen will go into No. 1 bedroom and wait a few minutes, I will find a spare room for one of you as soon as I've shown the others to their rooms." Well, now, having thus bestowed two gentleman in No. 1, she puts the third in No. 2, the fourth in No. 3, the fifth in No. 4, the sixth in No. 5, the seventh in No. 6, the eight in No. 7, the ninth in No. 8, the tenth in No. 9, and the eleventh in No. 10. She then came back to No. 1, where, you will remember, she had left the twelfth gentleman along with the first, and said: "I've now accommodated all the rest, and have still a room to spare ; so if one of you will please step into No. 11, you will find it empty." Thus the twelfth man got his bedroom. Of course there is a hole in the saucepan somewhere ; but we leave the reader to determine exactly where the fallacy is, with just a warning to think twice before deciding as to which, if any of the travellers, was the "odd man out."

and others, are more heartily appreciated to-day than ever before. Their books were the offspring of an original observance and a lofty motive, and will stand the wear and tear of time. In reflecting upon the glory and genius of the past we may well strain our memories with anxiety and reverence to eatch the sound of the mighty words of those men,

"Whose distant footsteps echo Through the corridors of time."

EDGAR A. POE.

"Whoever thinks a faultless piece to see Thinks what ne'er was, nor is, nor e'er shall be."

The literature of a nation is the written evidence of its civilization, and the criterion of its equality with, or superiority over other nations. As the progressive tendencies of a nation assert themselves in the development of their country's resources, literature, in harmony with art and science, expands into a broader field of action and a higher plane of thought, and as the people become intelligent and of liberal views, the literature becomes liberal, comprehensive and instructive. So marked indeed is the influence of letters, that there is a disposition with modern historians to rank nations according to their Belles Lettres, rather than by any other feature of excelence. America, with its distinct national character, has its own school of poetry and prose, a position attained since the close of the eighteenth century.

In the galaxy of bright American authors who have made for this country its distinctive literature, the subject of this sketch deserves a prominent and honorable position. Edgar Allan Poe was born in 1809. and after forty years of fitful and restless

the disregard of public opinion, that we find in the lives of the poets only an inverse parallel in Goldsmith's insatiate longing for the commendation of his fellows.

In viewing the life of Poe, we have adopted the sentiment of Pope as set forth in the admirable couplet which heads this article, and in so doing, we are not surprised with our review: He was far from being a faultless man, yet we find that with the dark shades in his life there are many brilliant hued rays of light. A man of misfortune, he was yet the favorite child of youthful minds, the defects of the poets life fortune in being naturally endowed for the position he occupied. The petted charge of an adopted and indulgent father, we find have been read. His private actions have a matured man with a wayward and capricious disposition. In all this we discern but a reasonable degree of human nature, but in the dignified and cultivated produc-This is an injustice that posterity will yet tions of his mind there appears the genius correct. Were his crimes so heinous, his of the intellectual man, and as we peruse defects so appalling, that the brilliant the strange outpourings of his stranger spirit, the conviction comes over us that his

"Never more." F. R. MCCONNELL

-Reports from different astronomical parties have been received. The observations of the transit of Venus were very successful at points in India, China, Japan and Egypt. At Shanghai the weather was unfavorable and the astronomers were disappointed. The American party at Hobartstown were only partially successful. At Nagasaki the chief astronomer, Professor Davidson, reports cloudy weather during a portion of the transit, but some excellent results.

-A man in New Jersey had not been to church for twenty years. Last Sunday he went, had his pocket picked of \$35,

-An undergraduate at Cambridge, who found among the questions on his examination paper this, "Why will not a pin stand upon its point ?" elaborately explained the point thus: "1. A pin will not stand on its head, much less is it possible that it should stand on its point. 2. A point, according to Euclid, is that which has no parts and no magnitude. A pin cannot stand on that which has no parts and no magnitude, and therefore no pin can stand on its point. 3. It will if you stick it in."-Yale Lit.

-A young lady who is studying French, wrote home to her parents that she was invited out to a dejenuer the day before, and was going out to a fete champetre the next day. The professor of the college was surprised to receive a dispatch from the "old man" a day or two afterwards, saying, "If you cant keep my daughter from them blasted side-shows and menageries, I will come down and see what ails her."-Ex.

-"Did I not give you a flogging the other day?" said a school-master to a trembling boy. "Yes, sir," he answered. "Well what do the Scriptures say on the subject?" "I don't know sir," said the other, "except it is that passage which says, it is more blessed to give than to receive."-Ex.

AGENTS—Parties wishing to act as our agents in any town, can retain a commission of 25 per cent on all subscriptions. The exclusive agency for any place will be given to responsible parties, on application. Adress all communications to the HIGH SCHOOL, Omaha, Neb.

TO SUBSCRIBERS.

On and after the first day of January, 1875, the postage on newspapers will have to be paid by the publisher. This we pronounce a just law, although a faithful observance of it will cost us many dollars during a year. We do not ask our subscribers to pay it, but will allow them the benefit of that if they will send in their subscriptions at once.

YOUNG MEN INSURING THEIR LIVES.

Our attention was called not long since, to a young man, just entering the prime of life, who was making preparations to have his life insured. We immediately advised him to discard the idea. Our advice to all young men, were it worthy of a hearing, would be to never grant an insurance company a life lease on their pocket-books. Of all the foolish things a young man could do, the most foolish would be to take out an insurance policy on his life. You ask, why? In the first place every young man naturally hopes to live to a good old age, and if he commences to pay insurance on his life, while young, he will be just so much out of pocket when he grows up. His only chance to win anything at such a game would be to die before he had invested much, but we can't see any advantage in a game where you have to die to beat it. Here we are told that after so long a time, generally ten years, the money paid in can be drawn out by the person insuring. This is a very fair looking proposition and well calculated to deceive young men. A young man who can assure himself that he will always be able to pay the premium on his policy when due for a period of ten years, can safely drop the insurance policy in the beginning if he has got one-the best way is not to commence at all-and save the money with the rest that will accumulate, if he is steady and industrious enough to keep making and saving all that time, and at the end of the ten years he will have the money in his own hands, and not in the hands of some one else. He will not have to risk the suspension of the insurance company will not have to trouble himself about getting it back, or await the convenience of an agent; will not have to run the risk of loosing it all, should he in that great lapse of time ever lack the necessary amount to meet his obligation, and in short, he will be his own master and not the driven slave of an insurance company that is continually growing rich on the hard earned money of such misguided young men. A young man wishing to provide for his mother or father in case of his death, can go to a good bank and there deposit in their names the money that would otherwise have gone into the coffers of the insurance company. -Through the courtesy of Prof. Smith we were shown the workings of the new sciopticon that he recently purchased for use in the class room. The objects viewed were painted on glass by several accomplished artists, prominent among whom are Miss Coates, Mr. C. J. Emery, Prof. Smith and N. J. Neilson, the latter gentleman being by far the best draughtsman in the building. Some time ago Prof. Smith asked of the Board of Education a small appropriation for the purchase of this instrument and the necessary photographs to be used for illustrating lessons in Botany, Physiology &c. The appropriation was refused. He subsequently proposed to secure the instrument at his own expense, if the Board would vote a hundred dollars for the purchase of the necessary photographs. No definite action was taken on this proposition and he sent for the instrument at his own expense. It has been shown to several members of the Board, who admitted that it would be of great benefit in the class room, and accordingly they have ordered a room prepared for its use. Prof. Smith displays a commendable interest in the welfare of his class by secur-

ing this useful article at his own expense, and we have no doubt that the Board will purchase the necessary photographs, and, perhaps, reimburse him for his outlay.

THE NEW YORK COMPULSORY EDU-CATION ACT, which compels the attendance of all children between eight and fourteen years of age, became operative Jan. 1, 1875. The Board of Education intend to enforce the act mildly and thoroughly, and in order to ensure its establishment, each city ward will be divided into as many districts as there are schoolhouses, and to each district one truant agent will be appointed, whose first duty will be to ascertain accurately the number and residence of all the children in his district. The facts, as thus ascertained, will be the basis upon which the law will

will be the basis upon which the law will be invoked whenever parents cannot be otherwise induced to send their children to school. A strict enforcement of the act will necessarily result in considerable expense to the city; for, as the schoolhouses are already full, additional accomodations will have to be provided for those children whom the act affects, and who have not hitherto attended school. Vagrant children, moreover, will have to be sent to the farm for young children, under the charge of the Commissioners of Charity and Correction, and there their food and clothing, as well as their teaching, must be provided for. The act, it may be added, provides that not only the parents who allow their children to stay away from school, but also all persons who employ them in any way, are liable to a fine. Although this experiment is not yet fairly commenced, enough is already known to convince New York school officers that a strict execution of the law will require a great deal of exertion on their parts.

EDITORIAL NOTES.

There is considerable difference between the battles of Bull's Hill and Bunker Run, so we are informed by modern historians.

The Faculty of the Nebraska State Normal School consists of nine professors and assistants, and the institution accomodates two hundred and ten students.

The next annual meeting of the Nebraska Teachers' Association will take place in this city, about the latter part of March. Prof. Smith will deliver an address before the association.

Contributions, to insure our acceptance, should be brief. For the benefit of amateurs we give the following example: "Enclosed please find \$1, for which send the HIGH SCHOOL to my address one year." The literary merit of such a contribution can be seen at a glance.

PREPARATION FOR COLLEGE.

THE HIGH SCHOOL.

The proportion of students preparing for college in academies and high schools in the U.S. respectively is given in the recent report of Gen. Eaton, U. S. Com. Education. The whole number preparing for classical colleges (1873) was 38,875. Of these only 2,965 were in public high schools, and 35,910 were in academies and preparatory departments of colleges (of the same rank with academies.) The whole number preparing for scientific colleges was 6,477. Of these 1,233 were in public high schools and 5,244 in academies and colleges. In the West most of the preparatory work is done by the colleges themselves; in the East by the academies; in neither section is it done to any extent by high schools. Then New England academies send 83 out of every 100 students to the Eastern classical colleges; but 771 out of every 100 entering Western colleges are prepared by the colleges themselves, as the statistics in the five oldest Western states show .- Yale Lit.

COLORED CHILDREN IN THE PUBLIC SCHOOLS OF INDIANA .- Under a recent decision of the Supreme Court of Indiana, thirty-five colored children were ejected from the public schools of Brazil, Clay county, by order of the local trustees. This practical application of the decision was made with indecent haste and inexcusable hard-heartedness. We are glad to know that no unkindness is chargeable to the Superintendent or teachers of Brazil. On the contrary the expulsion took place against the protestations of the Superin-tendent and the expressed wishes of the teachers. The children begged piteously to be allowed to remain. But the privilege was unrelentingly refused. Mixed schools had been decided unconstitutional in Indiana.-Cornell Era.

AIR AND RELIGION.

Many a farmer and housekeeper wonder why it is that they must needs take a nap every Sunday in sermon time. When the parson gets comfortably into the second or third head of his discourse and the congregation have settled into the easiest position to listen, gentle sleep begins to steal over their faculties, and the good man is surprised at finding his argument less cogent than it seemed when prepared in the solitude of his study. At home the busy matron never thinks of napping at eleven o'clock in the morning, and the man of business would consider his sanity or common sense sadly called in question should a friend propose a half-hour's nap at that hour of the day. Nevertheless, they both sleep like kittens in their pews, and logic, rhetoric, eloquence, are alike wasted in the vain attempt to rouse their sluggish souls. The question of the poet, so often sung in our assemblies,

"My drowsy powers, why sleep ye so!"

THEY DO SAY!

WHO SAYS SO?

THE PEOPLE SAY

THAT BUSHMAN DOES SELL

of More Goods for less money than any other Dry Goods House in the City, and why do they SAY SO?

BECAUSE

He sells as Cheap in Omaha as they are sold in New York City at retail, because his prices at Retail on Many Goods are less than the usual Wholesale price.

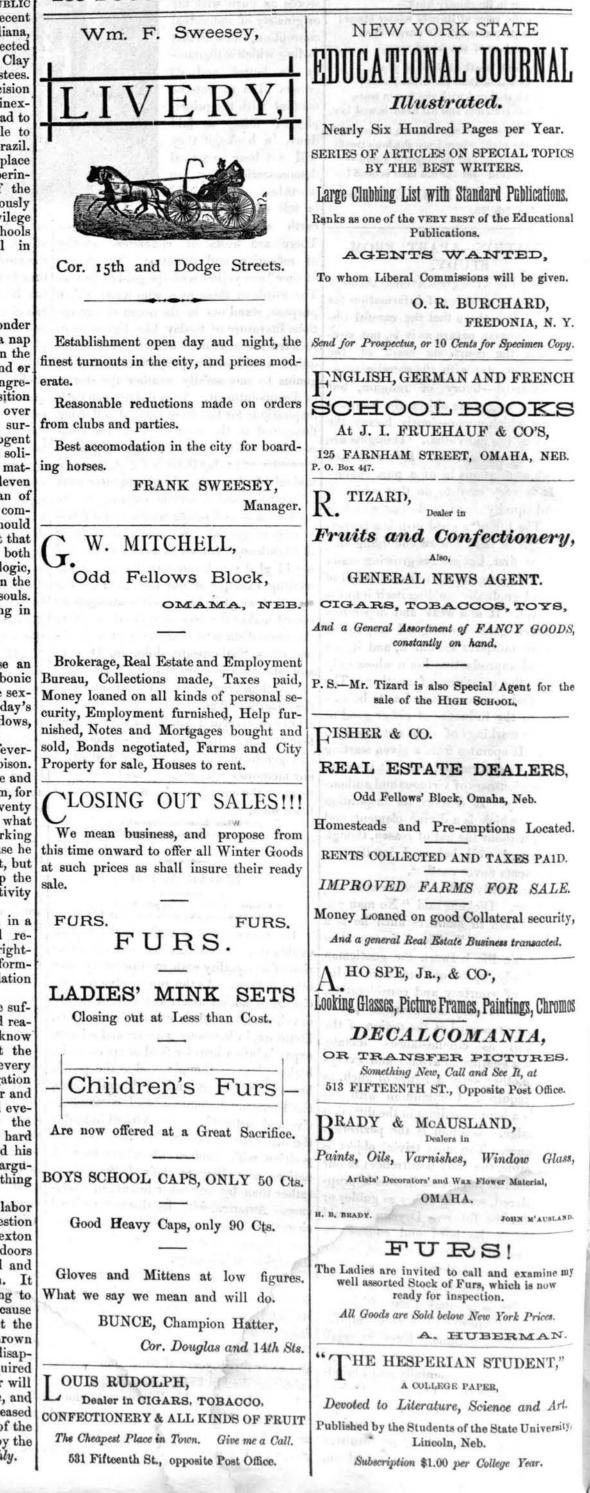

AND LAST BUT NOT LEAST,

Because the PEOPLE have found out for themselves that a CHILD CAN BUY as cheap and safely as the most experienced buyer, and that it is his aim to make his store the most

RELIABLE AND PLEASANT

Place of Business in this great new Northwest

BUSHMAN makes a Specialty of the Cash Paying Retail Trade. 265 DOUGLAS STREET, One Door from 15th Street.

King Kalakaua said to one of the accompanying gentlemen, that the High School contained several handsome young ladies, and intelligent young men. As far as the ladies are concerned, he was "eminently correct," but we fail to see how he discovered intelligence in the motley crew of numskulls that new compose a majority of the male students of that institution.

The long talked of inter-collegiate contest was held in New York City, on the 7th inst, J. C. Tomlinson of the University of New York, received the first prize in oratory, and Mr. Edmunds of Williams College the second. For essay writing, Chas. F. Cluck and Geo. H. Fitch, both of Cornell, received respectively first and second prizes. Their subjects were founded on parts of Shakespeare.

An Omaha bank clerk, accompanied by a school ma'am, paid a visit recently to the Deaf and Dumb Asylum near Council Bluffs. Not knowing where the proper entrance was, they approached a basement window and commenced making signs at the inmates who were supposed to be "dummies." Their feelings can be imagined when they heard the following :

"Who is it, Nancy ?"

"O, it's only a couple of mutes trying to get in the window."

-The New England college Presidents and Professors met in Hanover, New Hampshire, recently, and discussed among other matters, that of boating and students' regattas. The weight of opinion was in favor of encouraging the sport. Some thought that those who did the rowing were lowered in their class standing through consequent neglect of study, but the importance of physical culture was generally deemed to greatly overbalance the drawback. It was resolved not to interfere in any way with the college regattas next season.—Ex. is exactly in point, and we propose an answer: "because we are breathing carbonic acid gas—deadly poison; because the sexton did not let the foul air of last Sunday's congregation out of the doors and windows, and the fresh, pure air of heaven in."

and the fresh, pure air of heaven in." Look around at the audience; that feverish flush on the face isn't heat; it is poison. The lady nodding over there, her nose and face like a scarlet rose, is not too warm, for the thermometer doesn't stand over seventy dogrees; she is partially suffocated; what she wants is fresh air. The hard-working mechanic or farmer doesn't sleep because he watched with a sick child last night, but simply for the want of oxygen to keep the flames of intellectual and physical activity brightly burning.

Nobody can rise on wings of faith in a poisonous atmosphere. Oxygen and religion cannot be separated in this unrighteous manner. We cannot live in conformity to spiritual laws while in open violation of the physical.

Is your sexton a man of intelligence sufficient to understand the necessity and reason of ample ventilation? Does he know that every human being vitiates, at the least estimate, four cubic feet of air every minute? Linger when the congregation leaves, and see if he shuts every door and window tight to keep in the heat till evening service. Then see how dimly the lamps burn in the vitiated air; how hard the minister tries to raise himself and his listeners to the height of some great argument, and how stupid they are—nothing but bad air.

Now for the remedy, which costs labor and money both, for ventilation is a question of dollars and cents. Saturday the sexton should be instructed to open all the doors and windows, to let out all the dead and foul air, and let in all that is fresh. It takes no more coal on Sunday morning to heat the church to seventy degrees because of its purification. Sunday noon let the openings of the church be again thrown wide-warmth and bad air will alike disappear, and though extra coal may be required to raise the temperature, the minister will preach so much better in consequence, and the hearers will listen with such increased relish to the sacred word, that the loss of the pocket will be infinitely compensated by the gain of the soul.—Educational Monthly. February, 1875.

highly entertaining to the young men who compose the Society. It will continue about four or five weeks after which the House will resolve itself back into the Society. A ROYAL VISITOR. The High School of Omaha was favored with a visit from King Kalakaua, Thurs- day, January 21st, the day he spent in Omaha. This compliment to the Omaha High School is one that many eastern schools cannot boast of, and on this account it was regarded as quite a favor. He arrived during recess in the forenoon and immediately upon his appearance the noisy tumult of recess was changed into perfect quiet. The King was shown through several of the rooms and introduced to the various teachers by Supt. Beals, Mr. Howard Ken- nedy and Mr. C. K. Coutant. The last room visited was the High School depart- ment and here the King made the follow- ing neat little speech in response to the marked courtesy shown him by the students. Young Gentlemen and Ladies : I am much delighted to see you. I came here to see your schools and to observe your methods of obtaining an education, and it affords me great pleasure to see that you are endeavoring to fit yourselves to become useful citizens. By obtaining an education you not only qualify yourselves for the duties in life, which will hereafter devolve upon you, but you gratify your fathers and mothers, who are delighted to see you improve. I shall carry back to my country the most pleasant recollections of my visit to the Omaha High School. He asked numerous questions regarding	 —Another examination of teachers occured on Saturday, the 30th of January, at the office of Supt. Beals. Fitch, the young gentleman who was awarded the prize for the best essay read at the inter-collegiate contest, is a 	New Primary Geography, Retail Price, 75 New Common School Geography, 1.88 Brief Course in Geography, 1.88 Brief Course in Geography, 1.89 Brief Course in Geography, 1.60 GREENE'S GRAMMARS. New Introduction to English Grammar,	America more pressing than another, it has been the want of a text-book of convenient size and scope, upon the subject of Morals and Manners. Gow's Manual should be in every school in the land : and if the teach- ers were compelled to devote one-tenth of the usual school session to the subject, the nation would be saved a hundred times the value thereof in the decrease of crime and punish- ment. I shall recommend its use in all our schools." ISAAC H. BROWN, County Com- missioner Public Schools, Jefferson County Mo. A single sample copy of Gow's Good Morars and gentle MANNERS will be sent post-PAID to any school Officer or Teacher, for examination with a view to introduction into schools, at the introduction price, 94 cents. THALHEIMER'S MEDLEVAL AND MOD- REN HISTORY. THALHEIMER'S ANCIENT HISTORY, VENABLE'S SCHOOL STAGE, DUFFET'S FRENCH METHOD, HALMAN'S KINDERGARTEN OULTURE, ANDREW'S MANUAL OF THE CONSTITU- TION, ETC., ETC. Send for DESCRIPTIVE CIRCULARS and Price List. Liberal Terms on Sample Copies and Sup- plies for Introduction.
